DESCRIPTION

A highly detailed fully customized female body for Conan Exiles

Features:

High poly meshes designed with shapely hips , butt , thighs , calves and breasts.
 The increased number of polygons allows for a much smoother shape.
 Detailed 3D private region with physics
 Custom smoother UVmap to allow for better texturing
 Custom high detailed textures

3 levels of custom made LOD..For anyone that doesn't know what this is.. It is *Level of Detail* which reduces the amount of polygons rendered at further distances. This puts less strain on your GPU. All converted armors will also use LOD

Thanks to:

WaffleButter who painted the custom skin texture and motivated me to convert my Skyrim body over to Conan.

NOTE:

Due to how different the shape of this body is versus Conan's original body, all armor will have to be converted over to fit it.

The way the Conan armors work is they each have the body mesh attached to them so in other words each armor has its own body. If an unconverted top and a converted bottom are worn there will be a noticeable gap between them at the waistline. This will happen until I have a chance to finish converting all the armor tops, bottoms and boots.

To avoid having this happen just be sure to wear both upper and lower unconverted armors and dont mix and match with converted ones. Until I have a chance to finish converting them all.

This mod is in its early stages and will likely be changing over time.
Consider this an Alpha.

Difference between this body and my Aquilonain Females body mod

This body has a very different shape that was not limited by the vanilla waistline. Limiting myself is what I did for the Aquilonian Females mod. This time around I did not restrict myself to maintaining the vanilla waistline , the lower leg or the vanilla uvmap during the design phase. Because of this I was able to shape this body with the curves that I wanted.

You can view how different the 2 bodies are in the last screenshot I posted above.

Future plans:

Convert more armors to fit the new body

Whether muscles are displayed on this body? I tried this mod about a year ago and saw muscle levels not working. How are things going now? Or was it my bug?

LazyButler 10 Mar @ 7:31am

Yeap mod is great... my settings went crap reinstall fixed it.

Fey Warrior 9 Mar @ 5:19pm

@stallionberry Has the server you logon to restarted/updated since the mod update?

@LazyButler It might be due to your server or client's Maxium Nudity setting? Check those first.

stallionberry 9 Mar @ 4:16pm

Server says "wrong version"...any update?

LazyButler 9 Mar @ 3:44pm

I dont see any nude... does it have the capability?

Mainpikkewyn 9 Mar @ 10:28am

Do you possibly have a download link for the previous version before todays update, as my server still needs to be updated with the new version

Nermal_66 9 Mar @ 1:46am

Glad to see, that you are back, Alice. The body "armor" is an amazing idea. Can you add some nice body piercings (nipple and navel thingies...), please?

Crydraco 7 Mar @ 4:44am

Hello. Is the conversion of the Bejewelled Chains, loincloth and other Debaucheries of Derketo stuff is planned? Thx

TheHourMan 18 Feb @ 3:30am

Interesting. Well as I see more pop up I will show my support. Definitely the best looking body mod by far. Too bad it's so much work to convert everything manually rather than using some kind of tool such as Skyrim's bodyslide.

Nerube 18 Feb @ 12:33am

@TheHourMan the DLC armors have been brought up a few times in the past. I guess the devs havent released the kit for those or something and so they are unavailable to be edited (according to past responses at least) I believe the rest of the vanilla armors are planned but not rapidly as this is more of a spare time thing in the life of a busy individual (also according to past posts)
